Update 01/03/2023

Log Water Channel Carved

Manufacturers Information | PN1231

Material Specifications

Log	Ironbark timber, river rocks and resin
Footings	Stainless Steel
Fixings	Stainless Steel

Equipment Specifications

Free Height of Fall	Not required
Fall Zone Size	Not required
Activity Space Required	Allow 1m around equipment
Highest Point	Dependant on installation

Other Required Information

Spare Parts	Available to order
Largest Part	Log channel
Heaviest Part	Log Channel 21-40kg Two Person Lift

Standards

AS 4685 2021 Series

Applications

Age Group	3 years +
Supervision Level	Young children should be supervised and inappropriate activities discouraged
Playspaces	Public parks, schools, early childhood centres commercial play areas
Environment	Shade preferred for user comfort and protection. Salt air environments may reduce life of steel.
Vandalism Resistance	Low susceptibility

Update 01/03/2023

Log Water Channel Carved

Manufacturers Information | PN1231

Installation

Footing quantities and depths

From ground level

Item	Qty	Hole Diameter	Hole Depth
Posts	2	300mm	600mm

Note:

This product is designed for no softfall. Check the proposed on site softfall depth. Please adjust depts of post holes accordingly, to achieve corect overall subsurface depth. This will maintain correct height of equipment above undersurface level.

Inspection Notes

All inspections and maintenance to be carried out by competent people with the appropriate knowledge, experience and authority.

Inspection Frequencies

These are a guide only – local risk factors such as heavy usage, nearness to coast, and vandalism patterns need to be taken into account.

Routine Visual Inspection - Daily

Check for breakages, loose fittings and debris. Where safety issues are identified, quarantine until repaired.

Operational Inspection - Quarterly

RVI plus:-
Check for wear in moving parts e.g. bearings, chains and links.
Check security of fixings.

Comprehensive Inspection - Annually

OI plus :-
Check for structural rigidity and degradation e.g. corrosion, decay etc. Where possible, remove undersurfacing to examine condition of supports and footings.

Maintenance

In areas of high exposure to sun, wind and rain more frequent treatments may be necessary.

Note: Ensure all replacement parts conform with manufacturers original specifications

Note: In heavy use environment, more frequent inspection regime recommended

Note: Quarantine equipment during installation, inspection & maintenance
